

TeamUp & Code

1. Introduction

- Simply its online text editor which can have special rooms for teams with supported video and text chat for team with command prompt to create a perfect developer team in addition all 6 members for ex can edit the same code base realtime.
- The beneficial that it will save team dev time with realtime communication and code editing and help employee to be apply for dev job and show their skills on real bases.

2. Expected List of Features

- Most programming language used for dev application ex JS Python PHP
- Realtime Text Editor that all can edit and refactor them together
- For companies and teams special room and enterprise database.
- Brief justifications for including these features.

3. Market Survey

- Codepen and websites similar with lacking of many features.
- Availability of Code Editing yet lack of co operation and communication between teams.
